Advising Guide for Select Majors in CAS

Updated Summer 2023

Applied Psychology: Students must complete APSY-UE 2 Introduction to Psychology & Its Principles & APSY-UE 10 Developmental Psychology prior to transition, and have at least a 2.7 GPA

Art History: ACA and ACC in the Arts and Cultures Sequence count as one elective toward the major, though not applicable towards the minor. Note students that receive a 5 on the AP Art History exam are exempt from survey courses (History of Western Art I and II), and should therefore begin with an advanced course.

Data Science: Students must complete an additional minor if they intend to major in Data Science. This requirement is waived if the student is completing a second major.

Dramatic Literature: ACA and ACC in the Arts and Cultures Sequence can be counted toward the major in Dramatic Literature if completed with a minimum grade of C, and will be applied toward the pre-1900 literature requirement and one elective course. This reduces the total requirements to complete the major by two classes, though students are still expected to complete History of Drama and Theatre I & II.

Economics: Students majoring in Economics can take Principles of Microeconomics and Principles of Macroeconomics in LS. In addition, students need to meet the prerequisites for Mathematics for Economics I in the first year, and should begin the math sequence for the major no later than sophomore year. Note that AP credit in Microeconomics and/or Macroeconomics (awarded with a score of 4 or 5) is acceptable toward the major, and reduces the total number of courses required. AP credit in Statistics, however, does not count toward the major, and must taken at NYU. No requirements for the Economics major may be completed during a J-Term.

English: Liberal Studies students will receive credit for two requirements toward the CAS English major, providing a C or higher was earned in the Arts and Cultures Sequence (ACA, ACC and ACM). The specific requirements satisfied are (a) the pre-1800 requirement and (b) one major elective. This reduces the total number of classes for the major. Students interested in registering for the introductory course in the major, Literary Interpretations, should contact the Director of the department for assistance, Patrick Deer (patrick.deer@nyu.edu).

Environmental Studies: Environmental Studies (ENSTU-UF 101) offered through Liberal Studies counts toward a core major requirement ENVST-UA 101 if taught by Prof. Nagle; counts toward a major elective ENVST-UA 200 if taught by Profs. Naro-Maciel, Douglas or Owen; or counts as a topics-based elective ENVST-UA 450 if taught by Prof. Whittington

European Studies: The Arts and Cultures Sequence (ACA, ACC, and ACM) and Global Works and Society Sequence (GWA, GWC and GWM) together satisfy two requirements for the major in European & Mediterranean Studies, specifically one social science electives and one culture elective for the major. This reduces the total requirements to complete the major by two classes.

History: Toward the major in History, three courses are accepted from Liberal Studies. In particular, GWA fulfills the Pre-1800 requirement, GWC fulfills an introductory requirement in European History, and GWM fulfills an elective in the major. This reduces the total number of courses required to complete the major in History by three classes.

International Relations: Students must complete POL-UA 700 International Politics AND either Principles/Introduction to Macroeconomics or Principles/Introduction to Microeconomics prior to transition.

Journalism: Journalism is offered as a second major (or co-major) only. Students should make sure to register in JOUR-UA 501 Investigating Journalism no later than their fourth semester in the Liberal Studies Core to complete the major sequence on time.

Music: The department of Music in CAS will accept Arts & Cultures Antiquity toward the major either as an elective or a a course satisfying the "Music, History & Culture" category.

Philosophy: The philosophy department in CAS will accept Global Works Modernity toward the major as an elective. This reduces the total requirements to complete the major by one class.

Politics: The politics department in CAS will accept Global Works Antiquity and Global Works Modernity together as equivalent to 1 elective toward the major. This reduces the total requirements to complete the major by one class.

Public Policy: Global Works Antiquity and Global Works Modernity together will satisfy the Ethics and Justice Requirement. This reduces the total requirements to complete the major by one class.

Psychology: Students must complete Introduction to Psychology (PSYCH-UA 1) and Statistics for Behavioral Sciences (PSYCH-UA-10) with a satisfactory grade in order to declare the major

Note: Computer Science, Data Science, Math, and Science Majors require careful sequencing of courses.
